

## Safe, Clean Water for Generations, No Matter What.

Our next-generation technology renews and protects your aging water infrastructure from the inside with minimal disruption to your communities.

### AGING INFRASTRUCTURE

Big cities across North America are facing emerging risk, as aging infrastructure threatens the reliability and quality of their water supply. There are an estimated 240,000 water main breaks per year in the USA, wasting over two trillion gallons of treated drinking water. According to the American Water Works Association, an estimated \$1 trillion is necessary to maintain and expand service to meet demands over the next 25 years.

### WE ARE THE PROVEN SOLUTION FOR RESILIENT WATER INFRASTRUCTURE:

- 01 Most reliable solution under extreme seismic activity
- 02 Eliminates water loss. Today, 37% of water in our communities is lost through water leaks
- 03 Most environmentally friendly option with less GHG
- 04 Gives an additional 50 years of life expectancy
- 05 Regains structural capacity
- 06 Regains pressure and flow capacity
- 07 Corrosion resistant
- 08 Rapid installation: three times faster versus traditional solutions
- 09 Eliminates the need for complete street excavation thus minimizing impact on communities and traffic flow
- 10 6 million feet lined. No technology as battle tested and proven

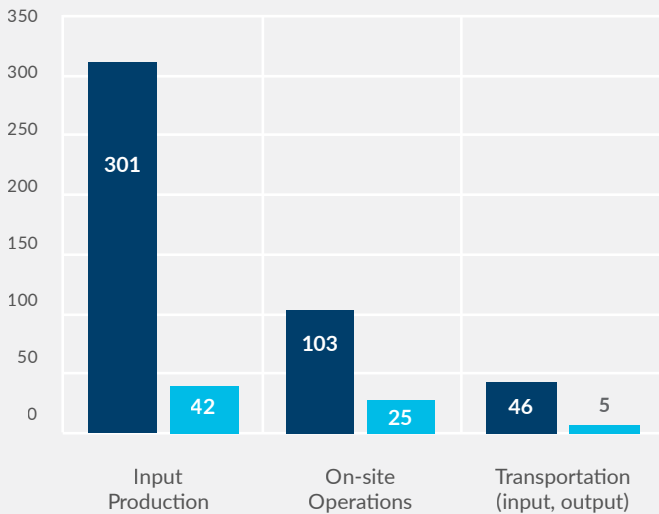

# PROVEN SOLUTION

1,300 MILES OF WATER TECHNOLOGY INSTALLED SO FAR HAS PROVEN TO:

REDUCE		PRESERVE	
	<b>443</b> KILOTONNES of GHGs		<b>21M</b> TONNES of soil
	<b>1240</b> TONNES OF atmospheric pollutants		<b>1,300</b> MILES AND MORE of drinking water mains
	<b>1.5x10<sup>10</sup></b> GALLONS OF drinking water leaks		<b>3.33</b> MILLION TONNES of landfill avoidance

## NEW GENERATION TECHNOLOGY: A Low Carbone Dioxide Emissions Solution

DISTRIBUTION OF GHG SOURCES

**450** Traditional Method Open Cut

**72** New Generation Technology

## WE ARE CERTIFIED

**ALTRA**  
PROVEN SOLUTIONS
